High Tech Foil Technology

Experience the difference with Wintegra Windows, where our craftsmanship shines. All our profiles come in base white and can be laminated on outside and inside. The foiling process permanently bonds profile with colour, achieving a perfect look of powder-coated aluminum, brushed steel, stained/ painted wood, or any other colour.

Highlights:

- Unleash your creativity with 125+ colours and textures
- Minimal maintenance, finish never chipping, cracking or fading away
- Colours with cool technology help the surface heat up less in direct sunlight
- The nano-coating protects against weathering, UV radiation and dirt
- Available for all Wintegra windows and doors
- No added production time

Custom Built Locally

All our products are manufactured at our facility in Abbotsford, BC, using specialized materials that create bigger, stronger, and more reliable windows and doors. Our factory is the sole production source, ensuring we maintain and control the machinery used to bring your vision to life, combining custom design with world-class engineering

Highlights:

- 4 week lead time
- Personalize your project with unique shapes, textures, grids, and other design options
- Consistent quality assurance
- Reduce CO2 produced through transportation when ordering from overseas

Tilt and Turn Windows + Hinged and French Doors

European Tilt and Turn design features an energy efficient window that opens inward for easy cleaning or can be tilted for secure home ventilation

Hinged doors are offered as a single sash creating a beautiful main entrance or as dual sash, also referred to as French doors. Perfect for patio, deck, between room or balcony access

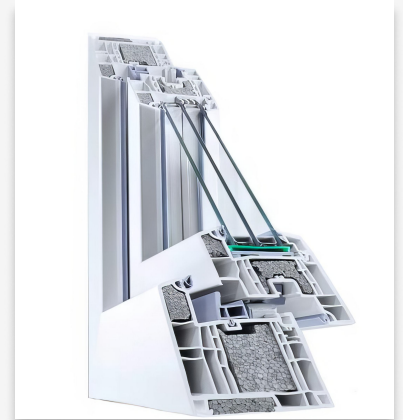

Select a system to manufacture your European window or Hinged/French door with

GENEO System

The Ultimate Choice for High Performance Windows and Doors, GENE0 offers a Passive House capable system using RAU-FIPRO, a revolutionary fiberglass composite material similar to those used in aeronautics and racing vehicles.

Highlights:

- Superior Strength for oversized window openings with 6-chamber profile
- Top-Performance ratings for thermal and sound Insulation thanks to reliable compression-seal technology
- Excellent air and water resistance with triple gaskets
- Increased security with Multipoint locking hardware
- Eliminate thermal bridging with decreased need for steel reinforcement

4500 System

A unique product for large openings in both residential and commercial markets featuring uPVC profile. Custom configured in size and finish allows customers to unleash their creativity.

Highlights:

- Optimal air and water tightness with multiple locking mechanism and dual weather seals
- Increased energy efficiency and acoustical performance with up to 1 $\frac{3}{8}$ in glazing capability
- Large chambers for accommodation of reinforcements required for large openings and heavy commercial applications
- High-definition finish for weather & stain resistance and ease of maintenance or cleaning

ASPEKT Casement Windows

ASPEKT casement window system offers unique features to make your life easier. With ASPEKT, casement, awning, and fixed units are possible as single or multi-lite configurations.

Highlights:

- Proprietary triple-seal technology for optimal air and water tightness
- Continuous frame concept for multi-lite configurations within one frame
- Frame options for greater installation flexibility
- High-definition finish for weather and stain resistance and ease of maintenance
- Design accepts a variety of screen styles including FlexScreen

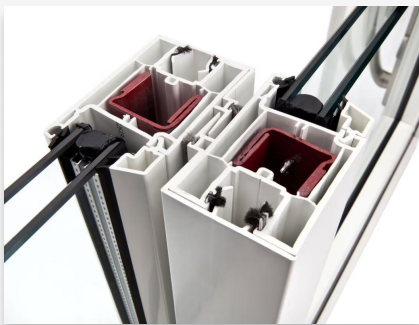

2200 Sliding Patio Doors

Designed to maximize daylight with extended glass-to-wall ratio while offering superior strength, sound abatement, and energy efficiency.

Highlights:

- Increased energy and acoustical properties with up to 1 1/4 in (32 mm) glazing channel to accommodate triple glazing
- Flexibility for new construction and replacement projects provided by 4 9/16 in (116 mm) frame depth
- Excellent structural ratings thanks to engineered aluminum reinforcements
- High-definition finish for weather and stain resistance and ease of maintenance

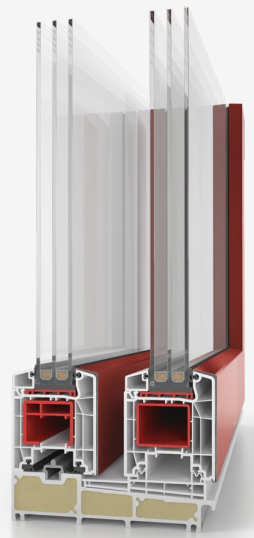

Premium Lift and Slide Doors

It doesn't get any better! The 85 mm lift-and-slide door impresses with its high energy efficiency and user-friendliness: even at its maximum size of 6.50 m x 2.80 m, the door can be opened and closed without effort and ensures a smooth and barrier-free transition to the outside.

- Effortless movement of oversized panels with an advanced European engineered hardware
- Superior values for wind, water tightness, security and acoustic insulation
- Refined design aesthetic with sleek track and architectural profile
- Enhanced insulation with high-performance thermally broken threshold
- Barrier-Free construction compatible
- Impressive thermal insulation capable of meeting Passive House Certification levels
